Minnows
Golden shiner

Physical Characteristics

Area - 14 acres

Temperatures

Surface - 73° F.

Maximum depth - 14 feet

14 feet - 65° F.

Lard Pond is a small kettle pond characterized by sandy, gravelly shores and no inlets or outlet. Several large white perch and pickerel were taken during the biological survey. These species, along with the hornpout reported to inhabit this small pond, should provide enjoyable fishing for cottage owners and their families.

There is no public right-of way at Lard Pond. Stocking is not recommended.

Surveyed - August, 1962

Maine Department of Inland Fisheries and Game
